

Welcome to the Eye On Water home page!

Set up Leak Notifications to notify you (via email and/or text) about potential leaks.

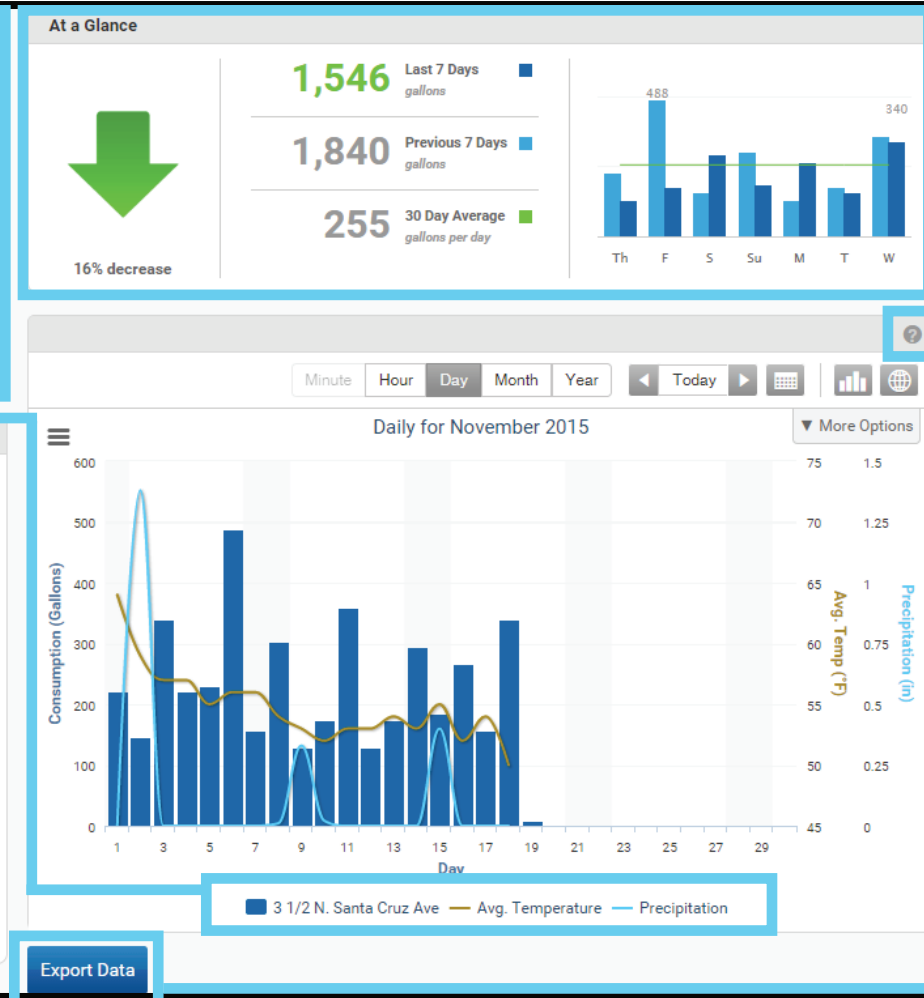

The 'Leaks' section features a faucet icon with water droplets. Below it, a green message states 'No leak detected. Great job!'. At the bottom, there is a blue button labeled 'Edit Leak Alert'.

Easily view your daily usage graphs, as well as overlays that you can select, such as the daily average temperature

The 'Your Meter' section includes a house icon with a meter. Text below reads: 'Your meter measures the quantity of water used in your household. Flow is measured electronically at hourly intervals, and updated every 24 hours for billing and leak detection.' Below this text are three rows of information: 'Read Frequency: Hourly', 'Meter Read: 2:59 AM on Nov 19 200.5300 CCF', and 'Next Update: 2:59 AM on Nov 20'.

View information regarding your meter, including the last reading time and when the next update will be.

The 'At a Glance' section shows a large green downward arrow with '16% decrease' below it. It displays three metrics: '1,546 Last 7 Days gallons', '1,840 Previous 7 Days gallons', and '255 30 Day Average gallons per day'. A bar chart shows daily usage for the last 7 days (Th to W) with values 488 and 340. The 'Daily for November 2015' section features a combined bar and line chart for 'Consumption (Gallons)', 'Avg. Temp (F)', and 'Precipitation (in)'. The x-axis is labeled 'Day' and ranges from 1 to 29. A legend at the bottom identifies the series: '3 1/2 N. Santa Cruz Ave' (blue bars), 'Avg. Temperature' (yellow line), and 'Precipitation' (light blue line). A blue button labeled 'Export Data' is located at the bottom left of this section.

Compare your current usage to the previous week's usage

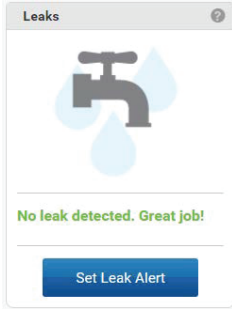

Any time you see a question mark, click on it to take you to the help section, so that you can learn how to use Eye on Water more efficiently

Export your Hourly, Daily or Monthly Meter Reads into an excel spreadsheet

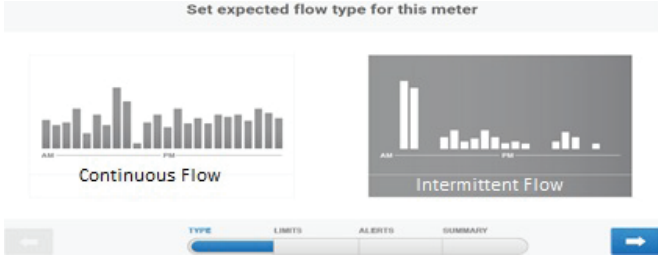

Remember!

The water we save today can help save tomorrow!

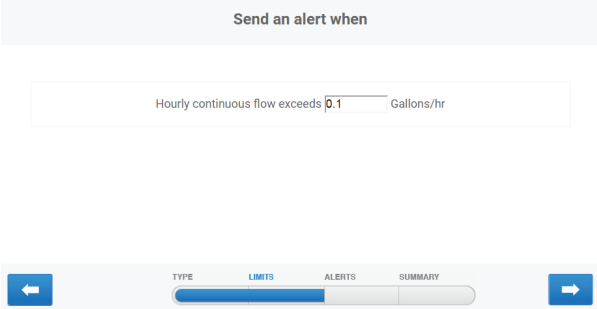

Leak Notifications are a useful way to monitor your system for potential leaks.

Step 1:
Click on
“Set Leak Alert”

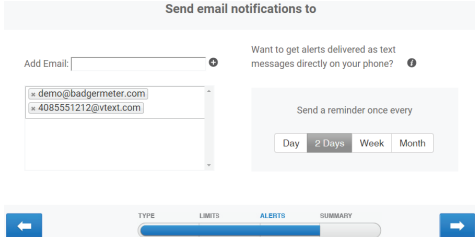

Step 2:
Define the type of flow you expect for this meter. We recommend Intermittent Flow.

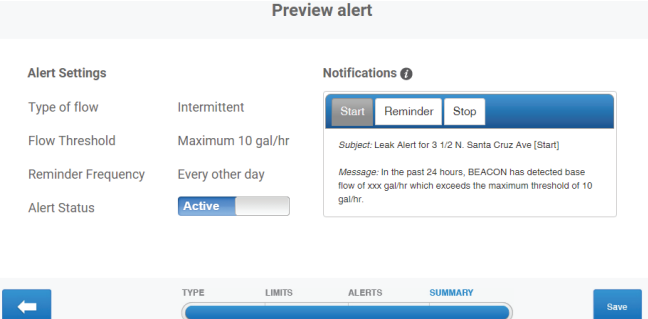

Step 3:

Determine the amount of gallons per hour to be exceeded for a notification to be sent. We recommend not to exceed 10 gallons per hour. Enter this amount in the “Hourly continuous flow exceeds,” field. While your meter collects data every hour, it is updated once a day (you can see what time this takes place in the “Your Meter” section on the Home Page). Notifications will cover a 24 hour period, letting you know that in the past 24 hours the base flow per hour exceeded the amount that you set. Please refer to the “Water Usage” section below for an idea of average usage, keeping in mind that usage will vary depending on the needs of that household/business.

Step 4:

Set up where you want the notification to be sent. You can set up multiple email addresses to receive alerts. Enter the email address in the “Add Email” field, then click on the plus button next to it. Repeat this as many times as you need to add all of the emails you wish to receive notifications. You can also set up a text alert to be sent. In the same “Add Email” field enter your phone number as an email address (for example, ATT customers would enter 1234567891@txt.att.net). Click on the i next to “Want to get alerts delivered as text messages directly on your phone?” for more information based on provider. In this step, you will also set up how often you want a reminder sent to you. You can set it up to remind you daily, once every two days, once a week, or even once a month.

Step 5:

Review the notification that you have set up. If everything looks right, click on Save. To turn off the notification simply click the “Active” button to make it “Inactive,” then Save your changes.

Usage Graphs are a great way to keep an eye on your water usage.

View usage by the minute, hour, day, month, or year.

Easily pull up the date you wish to see the usage data. Scroll through days by using the left and right arrows, or click on the calendar to select the date you want.

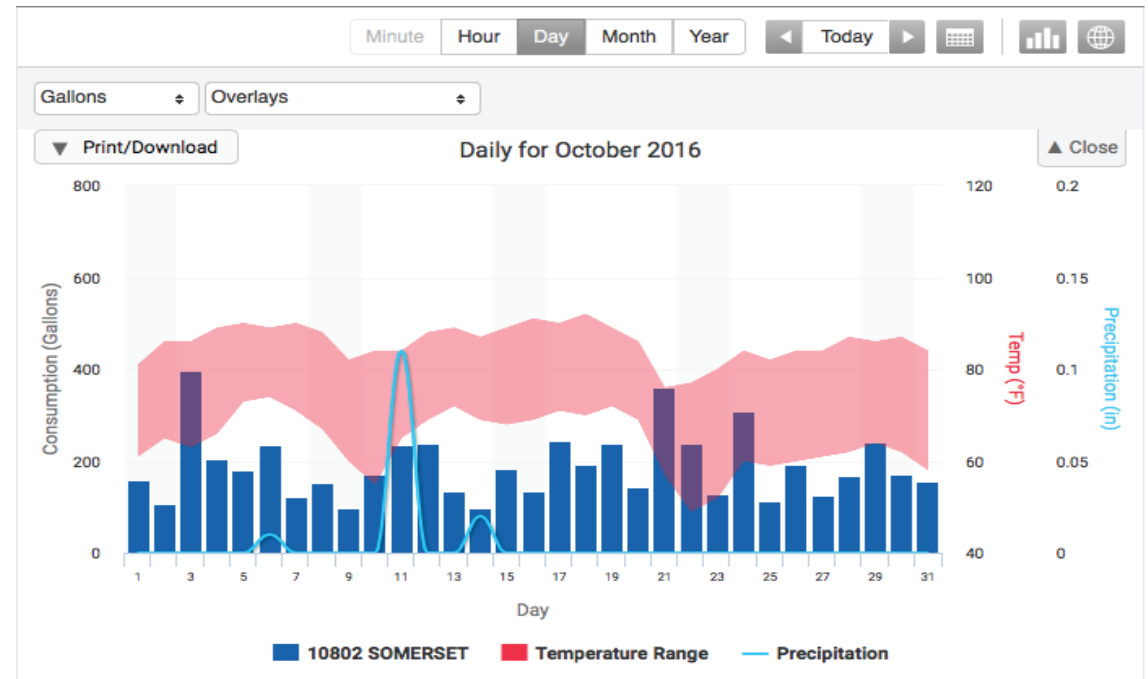

-This gives you the option to:
-Print the Chart
-Download the PNG Image
-Download PDF Document

Click on the globe to see a map of the approximate location of your meter.

When you select the **More Options** tab on the graph above, you are given more viewing options:

-You can view your usage data by:
-Gallons - this is how your water bill is calculated
-
-You can also view your usage data in relation to temperature and precipitation overlays. Available overlays are:
-Temperature in Fahrenheit
-Inches of Precipitation

Exporting

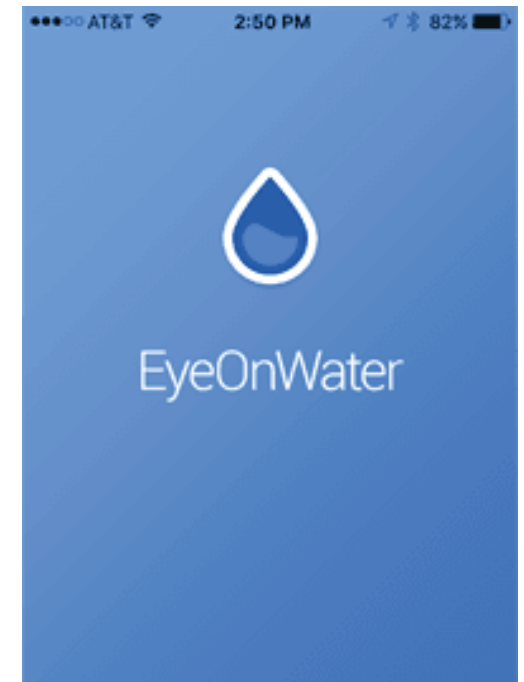

The screenshot shows the 'Export Data' form with the following settings: 'Date Range' is selected, 'Start Date' is 10/01/2016, 'End Date' is 10/31/2016, 'Read Interval' is 'Daily', and 'Unit' is 'Gallons'. A 'Start Data Export' button is visible at the bottom left. Below the form, 'Previous Export results' are listed: Date: Jul 13, 2017 8:36 AM, Meters: 1, Date Range: Latest Reads, Results File: [Click to Download](#) (size 1.3K).

The screenshot shows the 'Export Data' form with the 'Read Interval' dropdown menu open, displaying options: Daily, Quarter Hourly, Hourly, Daily, and Monthly. The 'Date Range' option is still selected. The 'Start Date' and 'End Date' fields are empty. The 'Unit' is 'Gallons'. Below the form, 'Previous Export results' are listed: Date: Jul 13, 2017 8:36 AM, Meters: 1, Date Range: Latest Reads, Results File: [Click to Download](#) (size 1.3K).

EyeOnWater has an app that is available for Android and Apple users.

Download it from your app store and sign in to your EyeOnWater account to easily access your usage on the go. You can even register for the first time on the app if you haven't already

When you export by Daily Meter Reads, it will generate a spreadsheet showing the actual meter reads for the specified time period you designate.

Select Daily Meter Reads. Then enter the start date and end date.

Select "Start Data Export" to run the report.

Choose what dates you'd like to view. It will then generate an Excel spreadsheet that provides the usage in gallons based on the aggregation you select.

Select how you would like to receive the date: by hour, by day, or by month.
